Executive Summary

Information Technology undergraduate and Full Stack Developer specializing in scalable MERN-stack applications and real-time distributed systems. Experienced in designing Redis-backed job queues, deterministic workflow orchestration, and production-grade backend architectures. Focused on system correctness, performance optimization, and clean service design.

Education

Kalasalingam academy of research and education 2022 – 2026
B.Tech in Information Technology CGPA: 8.06/10

Nagamani Ammal memorial metric higher secondary school 2020 – 2022
Higher Secondary Education (HSC) 75.8%

Projects

WorkZo – A Job search Platform
MERN, AI — GitHub . LIVE

- Built a full-stack MERN application connecting employers with workers for contract-based jobs.Implemented complete job lifecycle management including applications, tracking, and completion.
- Developed role-based dashboards with real-time notifications and job status updates.Designed worker profiles with skills, verified badges, ratings, and performance metrics.Ensured secure authentication and automated rating calculations using JWT.
- JWT-secured role-based access control, and an admin management suite with protected routes and live system monitoring dashboards.

EcoDrive Motors – Hybrid EV Business Investment Platform
React.js, Vite, JavaScript, Tailwind CSS, Recharts, jsPDF . LIVE

- Developed a responsive React-based business presentation platform for a hybrid automotive startup concept featuring hybrid cars and bikes.Built an interactive hybrid powertrain schematic using animated SVGs to demonstrate engine, electric motor, battery, and regenerative braking energy flow.
- Implemented interactive product showcases, vehicle specifications, savings calculations, financial visualizations, test-drive interactions, and investor-focused business information.Designed an investment and financial section presenting investment requirements, revenue projections, manufacturing costs, and business growth models through interactive charts.
- Implemented client-side PDF generation for investor presentations and vehicle brochures using jsPDF.Designed a responsive, component-based UI using Tailwind CSS, with reusable React components and modern UI/UX principles.

Skills

Languages: Html, Css, JavaScript
Frontend: React.js, Tailwindcss
Tools: Git, GitHub
